

DTB-VW-02 PVC Wristband (Double layer)

Product Description

NFC combine the RFID technology with good looking and practical housings. The resilient One-way RFID wristband is made of thin Polyvinylchloride (PVC). On the backside of the bracelet, embedded in the PVC, is the contact-less transponder chip.

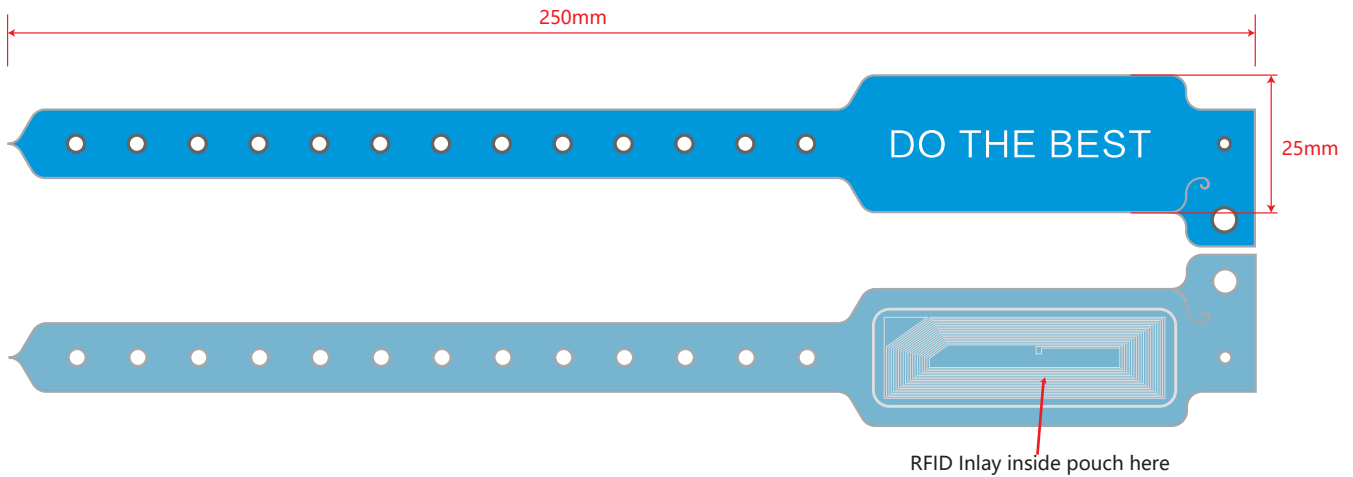

The RFID PVC bracelet is used for hospital patients as well as for prison inmates, for access control to events, festivals lasting several days. Cashless payments etc.
